SLU001@e.ntu.edu.sg

(+65) 9611-5113

## EDUCATION

---

### **B.Eng. Computer Engineering**

*NTU, Nanyang Technological University, Singapore*

*Anticipated Graduation: May 2016*

- CGPA 4.53 of 5.00
- Dean's List of Academic Year 2014/15

## EXPERIENCES

---

### **Internship, Building of a GPU Computing Research Cluster**

*Jul - Aug 2015*

- Attached to Rapid-Rich Object Search Lab, NTU
- Used Rocks cluster distribution
- Configured head node and compute nodes network connections
- Used Docker for Cuda GPU computing and LXC for resources provision and control
- Provided solutions for user management
- Worked nearly without supervision

### **Undergraduate Research Project, Study of Healthcare and Wellness Science using Wearable Sensors through Scientific Literature Approach**

*Sep 2014 - Jun 2015*

- Attached to Neural & Biomedical Technology Department (A\*star  $I^2R$  Singapore)
- Developed a text mining tool using Perl & Python for analyzing research publication abstracts
- Used Regex and simple data structures
- Solved case studies of 300,000 samples within 1 minute
- Fortified biomedical text mining by deploying web crawler
- Distinguished text mining situations using biomedical and multidisciplinary case studies
- Supervised by Associate Professor Wang Ping and Dr. Ge Yu

### **Internship, Development of Secure Thin Client for ATM**

*Dec 2014 - May 2015*

- Modified and installed XtratuM Hypervisor on x86 PC
- Developed a Linux USB device driver
- Developed an ATM GUI client using Qt/C++
- Compiled and installed Linux kernel into XtratuM
- Used Makefile, Bash and Perl scripts

### **Contest, 2013 ACM-ICPC Asia Jakarta Regional Contest**

*Oct 2013*

- Used Java Programming Language
- Participated representing School of Computer Engineering NTU
- Solved 3 problems (in team)

**Contest**, National Olympiad in Informatics, China

*Jul 2010*

- Used Pascal Programming Language
- Solved algorithm problems under Linux environment
- Won Bronze medalist

**Contest**, National Olympiad in Informatics in Provinces, China

*2006 - 11*

- Used Pascal Programming Language
- Solved algorithm problems under Windows environment

## COURSEWORK HIGHLIGHTS

---

- Managed an online invigilation software development
  - Agile Project development manager
  - Multithreaded, asynchronous video server development in Java
- Built a robotic system that can autonomously explore and traverse unknown areas
  - Chief Arduino Engineer/Hardware Leader in a team of eight
  - Exploration algorithm & obstacle detection algorithm
  - Arduino programming, Motor control, Sensor detection
- Implemented MIPS CPU under simulation in Verilog
  - Five-stage pipelining
  - Hazard detection & data forwarding
  - Static branch prediction & out-of-order execution as enhancements
- Implemented TLB based on understanding of Operating System concept
  - Nachos (C++ version) OS environment
  - Searching & replacing algorithm programming
- Designed and constructed a blood pulse wave data acquisition system
  - Signal conditioning, data acquisition
  - Post processing & graphic display in MatLab

## LEADERSHIP ACTIVITIES

---

**Vice President**, NTU Dragon & Lion Dance Troupe

*Aug 2013 - 14*

- Top tier club under Cultural Activities Club
- More than 40 active members
- Organizer of nationwide lion dance competition

**Founder & Leader**, ACM-ICPC Asia Jakarta Regional Contest team “FSM”

*Oct 2013*

- Self-organized training without supervision

## SKILLS

---

**Programming:** C/C++, Perl, Java, Python, Shell, Assembly, Verilog, Pascal

**Operating Systems:** Linux full-time user, Windows

**Hardware Platform:** Arduino, ARM Cortex development board, FPGA
