EDUCATION

B.Eng. Computer Engineering

NTU, Nanyang Technological University, Singapore

Anticipated Graduation: May 2016

- CGPA 4.53 of 5.00
- Dean's List of Academic Year 2014/15

EXPERIENCES

Internship, Building of a GPU Computing Research Cluster

Jul - Aug 2015

- Attached to Rapid-Rich Object Search Lab, NTU
- Used Rocks cluster distribution
- Configured head node and compute nodes network connections
- Used Docker for Cuda GPU computing and LXC for resources provision and control
- Provided solutions for user management
- Worked almost without supervision

Undergraduate Research Project, Study of Healthcare and Wellness Science using Wearable Sensors through Scientific Literature Approach

Sep 2014 - Jun 2015

- Attached to Neural & Biomedical Technology Department (A*star I^2R Singapore)
- Developed a text mining tool using Perl & Python for analyzing research publication abstracts
- Used Regex and simple data structures
- Solved case studies of 300,000 samples within 1 minute
- Fortified biomedical text mining by deploying web crawler
- Distinguished text mining situations using biomedical and multidisciplinary case studies
- Supervised by Associate Professor Wang Ping and Dr. Ge Yu

Internship, Development of Secure Thin Client for ATM

Dec 2014 - May 2015

- Modified and installed XtratuM Hypervisor on x86 PC
- Developed a Linux USB device driver
- Developed an ATM GUI client using Qt/C++
- Compiled and installed Linux kernel into XtratuM
- Used Makefile, Bash and Perl scripts

Contest, 2013 ACM-ICPC Asia Jakarta Regional Contest

Oct 2013

- Used Java Programming Language
- Participated representing School of Computer Engineering NTU
- Solved 3 problems (in team)

Contest, National Olympiad in Informatics, China

Jul 2010

- Used Pascal Programming Language
- Solved algorithm problems under Linux environment
- Won Bronze medalist

Contest, National Olympiad in Informatics in Provinces, China

Sep 2006 - Nov 2010

- Used Pascal Programming Language
- Solved algorithm problems under Windows environment

COURSEWORK HIGHLIGHTS

- Managed an online invigilation software development
 - Agile Project development manager
 - Multithreaded, asynchronous video server development in Java
- Built a robotic system that can autonomously explore and traverse unknown areas
 - Chief Arduino Engineer/Hardware Leader in a team of eight
 - Exploration algorithm & obstacle detection algorithm
 - Arduino programming, Motor control, Sensor detection
- Implemented MIPS CPU under simulation in Verilog
 - Five-stage pipelining
 - Hazard detection & data forwarding
 - Static branch prediction & out-of-order execution as enhancements
- Implemented TLB based on understanding of Operating System concept
 - Nachos (C++ version) OS environment
 - Searching & replacing algorithm programming
- Designed and constructed a blood pulse wave data acquisition system
 - Signal conditioning, data acquisition
 - Post processing & graphic display in MatLab

LEADERSHIP ACTIVITIES

Vice President, NTU Dragon & Lion Dance Troupe

Aug 2013 - Jul 2014

- Top tier club under Cultural Activities Club
- More than 40 active members
- Organizer of nationwide lion dance competition in Singapore

Founder & Leader, ACM-ICPC Asia Jakarta Regional Contest team “FSM”

Oct 2013

- Self-organized training without supervision

SKILLS

Programming: C/C++, Perl, Java, Python, Shell, Assembly, Verilog, Pascal

Operating Systems: Linux full-time user, Windows

Hardware Platform: Arduino, ARM Cortex development board, FPGA
